

**CLREVENT(a)**

**CLREVENT(a)**

**NAME**

clrevent — clear event flag(s)

**SYNOPSIS**

(clrevent = 33.)  
**clrevent(eflag)**

**DESCRIPTION**

*Clrevent* clears the event flag(s) specified by the bits set in *eflag*, in the PCB (See event(a) for definition of pre-defined flag bits). The bits set in *eflag* are reset in the *p\_event* word in the PCB. The bit(s) to be cleared normally correspond to the event(s) just received.

**SEE ALSO**
